AI-PMS: The Structured Framework for AI-Driven Project Delivery

Version 1.1 - (C) 2025 Brian W. All rights reserved.

Contact: BrianWBuilds.PM@gmail.com

Overview:

AI-PMS is a structured framework for managing artificial intelligence projects, integrating traditional project

Phases:

1. Initiate - Feasibility, data audit, stakeholder alignment

2. Plan - Success metrics, risks, adaptive timelines

3. Build - Data pipeline, training cycles, reproducibility

4. Validate - Accuracy, fairness, explainability, audit prep

5. Deploy - Production readiness, rollback planning, communication

6. Maintain - Drift monitoring, retraining, governance renewal

7. Closeout - Lessons learned, final approvals, archival, ownership transfer

What's Included in v1.1:

- All 7 AI-PMS lifecycle phases

- AI + Human collaboration prompts

- Metadata schemas for automation compatibility

- Governance and compliance checkpoints

- Lite track guidance for early-stage or internal teams

For full documentation, templates, and updates, visit the AI-PMS repository on GitHub.
